RULING ON ENTITLEMENT¹

On February 28, 2023, Demonta L. Hambright filed a petition for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*² (the “Vaccine Act”). Petitioner alleges that he suffered a shoulder injury related to vaccine administration (“SIRVA”) resulting from an influenza (“flu”) vaccination he received on or about November 11, 2021. Petition at 1. Petitioner further alleges that the vaccination was administered within the United States, he suffered the residual effects of his shoulder injury for more than six months, and that he has never received compensation in the form of an award or settlement, nor filed a civil action for his vaccine-related injuries. Petition at 1, 12. The case was assigned to the Special Processing Unit of the Office of Special Masters.

If, upon review, I agree that the identified material fits within this definition, I will redact such material from public access.

On December 12, 2023, Respondent filed his Rule 4(c) report in which he concedes that Petitioner is entitled to compensation in this case. Respondent's Rule 4(c) Report at 1. Respondent concluded that "[P]etitioner's alleged injury is consistent with SIRVA as defined by the Vaccine Injury Table." *Id.* at 3. Specifically, Respondent determined that "[P]etitioner had no history of pain, inflammation, or dysfunction of his left shoulder prior to vaccination; pain occurred within 48 hours after receipt of an intramuscular vaccination; pain was limited to the shoulder in which the vaccine was administered; and no other condition or abnormality has been identified to explain petitioner's shoulder pain." *Id.* at 3-4. Respondent further agrees that Petitioner suffered the residual effects of his condition for more than six months. *Id.*

In view of Respondent's position and the evidence of record, I find that Petitioner is entitled to compensation.

IT IS SO ORDERED.
